

Advanced Modeling with COMSOL Multiphysics® (Online)

**Dienstag, 19. November 2024 bis Mittwoch, 20. November 2024 | 09:00 Uhr bis 17:00 Uhr
NHR@KIT**

Learn advanced techniques and practical modeling tips from the comfort of your own office with COMSOL Multiphysics®. This free two-day online course is suitable for users who already have experience in modeling with the COMSOL Multiphysics® software. You will learn more about advanced simulation techniques that are useful across all application areas, such as built-in operators, solver settings, method programming for model automation, visualization, and result evaluation. Also, essential aspects of model management will also be covered. The course content will merge background and practical lectures, as well as guided and free exercise sessions. After participating in this course, you will be familiar with the key advanced functionalities of the COMSOL Multiphysics® software and will be able to productively solve complex tasks. This course is aimed at simulation specialists who have already gained some initial experience with COMSOL Multiphysics®. It is recommended that participants have the knowledge equivalent to the "Modeling with COMSOL Multiphysics®" introductory course. This course is free of charge for KIT members. Registrations will be accepted in the order in which they are received. Registrations from persons who are not members of KIT will not be accepted.
