

Modern C++ Software Design (Intermediate) (ONLINE course)

Dienstag, 07. März 2023 bis Freitag, 10. März 2023 | 08:30 Uhr bis 16:30 Uhr

Höchstleistungsrechenzentrum Stuttgart (HLRS) | 70569 Stuttgart

This intermediate C++ training is a course on software development with the C++ programming language. The focus of the training are the essential C++ software development principles, concepts, idioms, and best practices, which enable programmers to create professional, high-quality code.

This intermediate C++ training is a course on software development with the C++ programming language. The focus of the training are the essential C++ software development principles, concepts, idioms, and best practices, which enable programmers to create professional, high-quality code. The course will give insight into the different aspects of C++ (object-oriented programming, functional programming, generic programming) and will teach guidelines to develop mature, robust, maintainable, and efficient C++ code.
